I have found a listing showing ALL the units in 21st Army Group. Now, given that I aim to start this account from the moment we ceased fire, I will need to trace the "Stop position" of each unit; and I suppose, each sub unit. I will be contacting the owner of the site to ask his permission to copy the list and will then set to and post it here, setting up the required pages and links to start populating. Meantime, here is the link to the original:
